

PRAVARA INSTITUTE OF MEDICAL SCIENCES PRAVARA RURAL AYURVED COLLEGE

DEPARTMENT OF KARIYA SHARIR

VISION

To achieve excellence in understanding and teaching the normal functions of the human body according to Ayurvedic principles, particularly focusing on the concepts of Dosha, Dhatu, and Mala, by providing a strong foundation in both theoretical knowledge and practical application, enabling students to become skilled Ayurvedic practitioners capable of holistic patient care through evidence-based research and innovation in the field of physiology.

MISSION

Vision Statement

To educate students about the human body's physiology using Ayurveda and modern science. This helps students apply their knowledge in both theory and practice.

Core Objectives

To provide a comprehensive understanding of the normal physiological functions of the human body based on Ayurvedic principles, including the dynamics of Dosha, Dhatu, and Mala, thereby laying the foundation for diagnosing and treating diseases in an Ayurvedic context; essentially, it focuses on teaching the "normal functioning" of the body to understand disease pathology better.
